Binder Owners, Attention!

A Demonstration of the new (Genuine Hyett Roller Bearing Equipped)

John Deere Binder

--- will be held ---

Tuesday, July 31st,

Starting at 10 a.m.

Come and see this new machine: it will please you. Experts will give you much valuable information on your old machines. New parts now interchangeable on your old Binders.

We carry a complete line of Binder Repairs.

Ask any John Deere binder owner about our prompt service.

YOU WILL BE WELCOME!

Stony Plain Hardware.

Successful Poultrymen!

Are demanding the "Gillespie Maid" brand poultry and dairy feed. This is because they are scientifically blended, machine mixed, contain the highest quality ingredients and produce the desired results.

The ALBERTA PACIFIC GRAIN COMPANY
LICENCED AND REGISTERED WITH THE BOARD OF GRAIN COMMISSIONERS

A Double Feature Tonight.

The double feature coming to Kelly's Hall this evening, July 26, Mr Goodman promises will be the screen event of the year. This special feature brings to you "The Nunsmore," starring Lee Tracy; also Tom Keene and Barbara Kent. The 2d number will be "Freighters of Destiny," a genuine Western thriller.

The much-heralded film "Prosperity," Marie Dressler's screen success, was seen here on Thursday last. Marie was at her best in this picture, and the many comic scenes drew lots of laughs. "Over the Counter," the picture which opened the show, was a very hilarious one.

German-Canadian Reunion.

Posters are out announcing the big Dauchter Reunion, commencing on Saturday of next week, August 4. This annual reunion and picnic usually brings together some five or six thousand men, women and children.

The celebration this year will be held at Edmonton's south side athletic grounds. As usual, a full program of sports, concert and oratory will be carried out. Dr H. Seeham, of Winnipeg, German Consul for western Canada, will be among those to address the gathering.

Onoway's Sports Day.

Onoway Community Club has arranged a fine list of events for their Sports Day tomorrow, July 27. One of the big things on the program is the baseball tournament, in which Stony Plain players will participate. There will be contests of all kinds, including a pillow fight, climbing greasy pole. This latter event should prove interesting, as Mike says the game is won by the last one to get to the prize perched on high.

Glory Hills Phone Co.

The Alberta Gazette carries the announcement of the incorporation of "The Glory Hills Mutual Telephone Company" under the Companies Act of Alberta. Capital of the company \$300—\$10 shares at \$1 each. Registered office of the Company is in the Town of Stony Plain.

New Central Bank Bills.

Canadians will soon have a new type of note currency in their hands. Under the legislation creating the Bank of Canada there is provision for currency changes, which means that the present chartered bank and Dominion notes will be replaced by notes issued by the new Central bank. The replacement will be carried out at the rate of ten per cent per year, until ultimately only Bank of Canada notes will be issued. Just as soon as a decision is arrived at by the Dominion Cabinet regarding the organization of the Bank of Canada, steps can be taken in regard to issuing new currency and the other many functions of the new financial institution.

HARDWICK'S

MEN'S FANCY DRESS SOX—Reinforced heels and Toes; assorted colors, 19c.

MEN'S FINE BROADCLOTH SHIRTS, Collar attached; nice assortment of colors to choose from; all regular sizes; sale price \$1.

Character Makes The Man

In a little magazine sent regularly to the writer of this column through the courtesy and thoughtfulness of a friend, and which we always read with pleasure and profit, and from which we frequently quote, there recently appeared a short article that is both timely and worthy of consideration in these rather troublous days when we are inclined to place responsibility for all our ills upon governments, institutions, systems,—in fact, upon anything and everything except our own human frailties. The magazine article referred to reads as follows:

"Most of the ingenious schemes for making this a better world fall down because they assume that man is an angelic creature who would dance singing through the streets, with garlands in his hair, if only the chains of circumstance could be stricken from him. The trouble is that man isn't an angelic creature. He can be about the most ornery member of the animal kingdom. When he's mean, he makes the sabre-toothed tiger look like a domesticated tabby; and for ruthlessness he can bring blouses to the cheeks of a cobra. On the other hand, it's just as big a mistake to assume that man is all mean. He rises just as high as he falls. Nothing in the jungle can match him for courage and self-sacrifice. If he can be a beast, he can also be like those gentlemen who stood on the deck of the doomed 'Titanic,' singing in the face of death. As Byron said, he is half dust, half deity."

For many years, almost a century in fact, it has been an accepted idea in all democratically governed countries that education was the royal road to sweetness and light. Practically no one questioned it. Laws were enacted making education compulsory, and more and more money was cheerfully poured into the providing of free education for all children, always in the belief that when people are educated, a golden age would dawn. People in all our so-called civilized countries are now fairly well educated, in the sense that they have learned to read, but the golden age has not arrived. Apparently, good and splendid as it undoubtedly is, education in itself is not the miracle-worker it was supposed to be. And the trouble is that we have confused book-learning with education, and have set such store on knowledge of facts that we have forgotten about character.

With many sincere people the tendency now is to rely on legislation to accomplish all the reforms which religion and education have failed to bring about in our human relationships. Even some clergymen apparently believe that both education and the church have failed to develop human character and thus eradicate selfishness, meanness and dishonesty, but that when these powerful agencies have failed, parliaments and legislatures can succeed through the enactment and enforcement of man-made laws and governmental administration of purely man-made social and economic systems. This is a wholly false conception, and if our schools, colleges and churches should ever act upon it they would learn when too late how serious a mistake they had made.

Recognizing the truth of Byron's observation that man is half dust, half deity, the function of the church and of all forms of religion is to cultivate and develop the deity in man and thus seek to overcome the selfishness and meanness inherent in human nature, to inculcate the true principles of life and living, to teach the beauty, the joy, the happiness of true Christian living; in a word, to build up character.

And the function of schools and teachers supported as they are by the State is the counterpart of the church. It is not merely to impart knowledge but to so train the human intellect and develop man's reasoning powers as to enable him to think clearly, choose wisely, act with discernment and discretion and thereby attain to a full realization not only of his own rights and privileges but to a full appreciation of the rights and privileges of his fellow men, and of his own obligations to society as a whole; in a word to live as an intelligent, informed man of character should live.

Parliaments and legislatures have large and important duties to discharge, but under our democratic systems these legislative and administrative bodies will be, as they are intended to be, a reflection of the views and opinions of the people as a whole. Thus churches and schools through the discharge of their educational functions by raising the standard of intelligence and development of character will build up personal character and higher standards in thought and living, will hopefully affect all legislation and all administration. Much more of a permanently beneficial character can be effected in this way than by the definite commitment of churches and schools to any particular set of political policies, social reforms, or economic systems in a rapidly changing world.

If the people themselves are right, if they are men and women of character and conviction, if they are educated and intelligent, unselfish, honest and God-fearing, parliaments and legislatures, and the acts of these bodies, will be a reflection of their views and convictions. But if the people of any nation are not of this type, neither will their governments be, and all the propaganda of churches and schools will not make them so.

If we would improve our institutions and systems and governments, we must bring about a steady improvement in people themselves, and in the bringing about of such improvement lies the first and paramount duty of our churches and educational institutions.

Finding Ready Market

Demand From British Buyers For Canada's Dressed Poultry

Dressed poultry from Canada is finding a ready market in substantial quantities in the British Isles. From January 1 to May 31, 935,500 pounds have been exported, an increase of 537,122 pounds compared with the corresponding period of 1933. Meanwhile, the demand from British buyers continues active for the quality of the shipments have met the market requirements in every way, says an announcement from the department of agriculture.

Exports of Canadian cattle to Great Britain this year up to June 28 totalled 23,667 as against 22,505 for the corresponding period of last year.

Buys Decrepit Horses

Englishwoman Has Carried On Work For Twenty Years

Known only as the "Horses' Friend," a woman in Edmonton, England, has bought thousands of old horses and donkeys and unfit wild ponies and had them slaughtered humanely to prevent them from falling into the hands of dealers and worked under cruel conditions. At Barnet Fair recently she bought 90 animals; this year she has purchased 850. The woman, who insists on remaining anonymous, has carried on her work for 20 years. She is assisted financially in her efforts by a few friends.

Next to London, Calcutta, India, with suburbs is the most populous city in the British Empire.

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry will quickly relieve the pains, checks the action of the bowels, and thus does away with the suffering, the weakness, and oftentimes the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and bracing up the weak and exhausted system giving a strong tonic for the treatment of bowel complaints of both young and old.

On the market for 88 years—you do not experiment when you use it.

Put up only by The T. Milburn Co. Ltd., Toronto, Ont.

An Era Of Suspicion

Difficulties In The Way Of Achieving Universal Peace

In the world as it is to-day—to a greater extent even than in the days when Lord Meath and Lord Milner surveyed it—there are overwhelming difficulties in achieving anything like universal peace and freedom. For the moment an era of suspicious nationalism seems to make that ideal more remote than ever. But unquestionably the way to attain it lies through the gradual grouping of such nations as are prepared to work and trade together and to live at peace for all time with one another; and the one group ready formed for this great purpose—bound by all the ties of history, tradition and complementary requirements—the existing group of the British dominions and dependencies. To dissipate the vast imperialistic force for good would be something wiser than folly. To disparage it, as some of our Socialists are fond of doing, is to stultify their own pretensions. Surely the whole purpose of British statesmen in every capital of the Empire, whether they are Conservatives or Socialists, manufacturers or farmers, should be to consolidate it to strengthen it, and to attract to it like-minded lovers of peace wherever they may be found.—London Times.

New York Via Arctic

Proposed Air Route Would Find Favor With Aviators

The polar regions may soon become as familiar to British airmen as the Irish Sea or the Channel are to British seamen. The air-route to the Far East is nearly held by proceeding via the North Pole. If directional wireless proves the success hoped and expected of it, the 600-mile hops between wireless stations at Thorshavn (Faroe Islands), Reykjavik (Iceland), Augmagassak on the east coast of Greenland and Godthab on the west, and Resolution Island at the southern extremity of Baffinland will come into favor with flyers for several well-founded reasons. If it should prove a reliable proposition to check direction on these sections by wireless, the skilled pilot could contemplate a route along this route to the weather which at present would make it hazardous for he would be largely independent of form and other forms of bad visibility. Besides, though the length of this route from England to New York is 4,500 miles, and therefore greater than the direct route, a great advantage lies in the fact that it can be divided into 600-mile stages.

Ancient Reptile

Sinuous Creature Which Flapped About Prehistoric Ocean

Officials of the National museum at Ottawa say the two mosasaur specimens unearthed at Morden, Man, by Dominion geologists, were the first complete skeletons of the 60,110,000-year-old reptiles ever found in Canada. Scattered bones were found in Alberta three or four years ago but no complete specimen.

J. M. Steinberg, Dominion government geologist, who has unearthed many dinosaur skeletons in Western Canada will ship the fossilized bones to Ottawa where they will be mounted for display in the museum. A 25-foot specimen has been on display at Ottawa for some years but it was found in the United States. It may be a year before the completed sinuous creature, which flapped about the prehistoric ocean that covered Western Canada millions of years ago, is ready for the gaze of the public.

A Clever Idea

German industry has solved the problem of looking over the heads of a crowd without getting a stiff neck. At every big street parade in Berlin now, and there is one almost daily, scores of vendors make their ways through the crowd selling periscopes. With a periscope it is possible to have a front seat even if you are standing in the rear ranks.

It is believed by the Kultus of Australia that the spirits of the dead ascend to heaven by the rays of the sun.

A few centuries ago, the word "idiot" was used to designate a "private citizen."

Reaping The Harvest

Far East Has Awakened To Machine Age Era

Europe no longer can exploit the rest of the world as a market, and now, after destroying the civilization of the Orient and India, reaps the harvest, declared Frederick W. Northwood, celebrated preacher of the City Temple, London, England, at Vancouver.

Returning from an extended trip, he said the Far East had awakened to the machine-age era.

"In Japan you have a nation that has learned the lessons of western civilization, put them into practice and now is sending back a surplus of machine-made goods," he said.

The missionary was not to be blamed. There has been a remarkable increase in the number of foreign traders, particularly of Chinese and other forms of bad visibility. Besides, though the length of this route from England to New York is 4,500 miles, and therefore greater than the direct route, a great advantage lies in the fact that it can be divided into 600-mile stages.

"These people are increasingly conscious of what we have taken from them. We have got to think of humanity; stop putting tags on things and letting it go at that," he concluded.

Canadian Voodoosim

Human Cruelty Provides One Of The Serious Barriers To Medical Progress

An article in "Health," published by the Canadian Social Hygiene Council, points out the necessity for the general public realizing that many so-called cures are nothing but fakes. The article tells some rather interesting stories about medical credibility of physicians and the wives of fakirs.

The article concludes: "Perhaps it is futile to tell the public about these tragic occurrences, perhaps it is wasting time to ridicule the fakir and charlatan. Ethically the doctor can promise no one a cure but these medical gangsters, after getting their money, laugh at the helpless sufferer from cancer and the dying tuberculosis patient and promise him a cure." Often times neglected cases too late accept the advice of their own surgeons and are handed at the same time a death certificate.

Use Scalding Steam

Warders Well Protected If French Convicts Attempt Mutiny

Scalding steam is always held ready for use on the two hundred and eighty convicts bound for the French penal settlement on French Guiana, which includes Devil's Island, which recently embarked in the convict ship La Martiniere at La Rochelle. During the voyage the convicts are kept in cages under the constant surveillance of warders, who, in the event of attempted mutiny, would be able to turn steam on them.

Swimming And Health

An Exercise That Has Come To The Front As A Valuable Form Of Recreation

A well-known swimming instructor states, "The interest in swimming has been stimulated tremendously and it is now possible for people to indulge in this healthful recreation throughout the year."

Greater indulgence would naturally make the health of the nation greater. It may also be the means of saving the swimmer and another's life. An exercise which has been associated with which is to be performed. It may be performed to suit the age and physical condition of the individual. "The art of swimming has also developed marvelously," states a writer on "Health". In the early days the breast stroke and overhand stroke were commonly used. The trudgen and single over-arm stroke were next evolved. The writer outlines the methods of swimming and states, "Make up your mind that you will learn or improve". The crawl stroke is the most popular of all swim strokes. Champions all over the world use it and it is fast becoming the stroke for everybody. In explaining the crawl stroke attention is paid to position, breathing and practice. At this time of year swimming can be made easier by the reading of such an article.

Nearly 136,000,000 pounds of tobacco were grown in China last year, breaking all production records for the weed in that country.

DENICOTEA CIGARETTE HOLDER

DENICOTEA Cigarette Holder absorbs the nicotine, pyridine, ammonia and resinous and tarry substances found in tobacco smoke.

Work Is Pressing Forward On Trans-Canada Highway To Link Up Halifax With Vancouver

The rocky tangled terrain along the northern shore of Lake Superior now presents the only obstacle to the completion of the Trans-Canada highway from coast to coast.

Motorists may now drive from Halifax, on the Atlantic coast, to a point 45 miles north of Sault Ste. Marie, in northern Ontario, over reasonably good pavement and gravel roads. From there to Nipigon, however, roughly a distance of 300 miles lies a rugged stretch over which no car can pass. Here are masses of solid rock of all shapes and formations. There are trees and tangled undergrowth, ravines, gullies and numerous rivers.

Two legs on this uncompleted northern Ontario section have been surveyed and the work planned, but when they will be completed is problematical. One leg runs from the Soo to White River, noted as Canada's champion cold spot in winter-time. The other swings from White River to Hearst. Very little work has been done on either of these stretches yet.

There is a road from Nipigon to Port Arthur, while from Port Arthur to the Manitoba boundary, only about 30 miles of the highway still remains uncompleted. Work on this section will be completed ahead and it is expected that it will be opened by this coming fall.

Along the Ontario-Manitoba boundary the chain of motor roads stretches all the way to Vancouver, on the Pacific coast.

Twenty-five thousand bronzed young Canadians are at present engaged in pushing forward the Trans-Canada highway building program. The majority are battling with northern Ontario's wilderness. Throughout the rest of the country, however, much improvement and repair work is being done.

When these workers reach their goal the quarter-century dream of Canadian motorists will have come true. They will then be able to start in their cars at Halifax and travel to Vancouver, without having to detour through the United States.

Still Below Average

Canadian Wheat Crop Higher This Year Than Last

The International Institute of Agriculture indicated the Canadian wheat crop would be somewhat higher this year than last, but 18 per cent. below the average for the past five years.

This year's figure for Canada's wheat crop was given as \$39,000,000 bushels.

Last year's total was 268,000,000 bushels.

The average for the years from 1928 to 1932 was 441,000,000 bushels.

France Sets Wheat Price

Officially Dropped From \$2.00 To \$1.95 Per Bushel

The price of wheat has been officially dropped below \$2 a bushel for the first time in more than a year in France.

A new fixed price of 108 francs per quintal (\$1.95 a bushel) was published in the official journal as the result of a recent law increasing farm aid.

There was a widespread complaint the old price of 115 francs a quintal was not being observed.

No Time Like Present

All men are glad to have pleasant memories, but not all are providing the material for such memories. If you would look back by and by to something that you will be glad you said or did, now is the time to do or say something which will give you food for gladness. — Henry Clay Trumbull.

Wet shavings on the floor of a refrigerator car was the simple and inexpensive method adopted by U.S. specialists to keep pears and apples from freezing in transit from the northwest to eastern markets in moderately cold weather.

Summer Care Of Eggs

Must Be Kept Cool And Marketed Often As Possible

Eggs must have special attention in summer time, and extra precautions must be taken to keep them cool. A wire or wooden basket that permits a free circulation of air is ideal for gathering eggs and they should remain in the basket until they are cool before placing in the egg case. A clean cellar is the best place to keep them before they are marketed, which should be done as often as possible. Marketing twice a week during the summer is not too often.

Eggs show that high temperatures are very harmful to the fresh egg, if the egg is fertile. Incubation starts at around 70 degrees and if allowed to progress long enough, the egg becomes unfit for food. The eggs should be gathered two to three times a day, or as often as possible. Removing all broody hens to the broody coop as soon as they are noticed keeps the hens from setting on the fresh eggs, and is the best way to get them back to laying.

Seek New Arctic Seaway

Expedition Hopes To Shed Light On Franklin Tragedy

"I have a strong belief that I may be able to come across relics of the Franklin expedition and throw additional light on that tragic chapter in the history of Arctic exploration." Mitchell Price makes that statement in announcing his plans for an expedition to the archipelago lying between Baffin Land and the Beaufort sea.

Much of this territory, north of Canada, has never been thoroughly explored, and the main coast and adjacent islands are only roughly charted.

Mr. Pierce spent ten years in the Canadian north when serving with the Hudson's Bay Co.

The expedition will endeavor to find a seaway through Fox basin, Fury and Hecla straits and westward, following the mainland to the Pacific.

A Quaker once hearing a person tell how much he felt for another who was in distress and needed assistance, dryly asked him, "Friend, has thee felt in thy pocket for him?"

PROMINENT CANADIAN WOMEN HONORED BY THE KING

His Majesty the King has named several Canadians to the Venerable Order of the Hospital of St. John of Jerusalem. Top, left to right: Mrs. Amy Angus Bruce, wife of the Lieutenant-Governor of Ontario; Mrs. Olivia Mary MacLaren, wife of Hon. Murray MacLaren; and Mrs. Yvonne Desaulniers Marion, wife of Hon. R. J. Marion. Below, left and right: Senator Carline Reay Wilson, Canada's only woman Senator; and Mrs. Mildred Marian Fidridge, wife of the Canadian Minister to Washington. All these recipients have been made Dames of Grace of the Order of St. John of Jerusalem.

Outstanding Triumph Of Veterinary Surgery

Operation Saves Valuable Dog After Having Neck Broken

A greyhound, named Somebody's Choice, who, less than a month ago, broke his neck in three places, is again cantering round the training paddocks at Wembley stadium in England.

He looks, and is, the picture of health. His recovery is one of the outstanding triumphs of veterinary surgery.

Somebody's Choice suffered a spectacular fall in a recent hurdle trial. At first he was thought to be dead. Then it was discovered that he was alive, although his neck was broken.

His owner, S. Curson, begged the veterinary surgeon in attendance to do his best.

An arthrotomy operation was performed. What amounts to an artificial neck has been created by means of delicate silver plates. Flexibility has been achieved by clever manipulation.

Somebody's Choice will never race again. But he can bark and lord it over all the Mick the Millers in the world: he is the only dog alive to-day with a synthetic neck.

Testing Lumber For Pulpwood

Shipment From Tasmania Being Sent To Vancouver

A mill test of Tasmanian wood which may have far-reaching effect upon the pulp and paper industry of Canada is to be made shortly at the Ocean Falls plant of Pacific Mills Limited, Vancouver.

Suitability of the Antipodean lumber for producing pulpwood for newsprint is the question and considerable interest is being shown in the four-day test by lumber and newsprint men.

For many years Australia has endeavored to develop a pulpwood industry of its own. There are pulpwoods there that make suitable kraft paper but thus far the manufacturing of newsprint has not been attempted.

Extensive laboratory tests have been made, and recently a Tasmanian wood gave promises of results. A large shipment has been sent to Vancouver on board S.S. Walkawa, destined for Ocean Falls mills where a practical test will be run.

Master: Mary, has anybody telephoned while I've been out?"

Maid: "Yes, sir, but I could not make out the name. To be on the safe side, I said you would let him have something on account tomorrow."

safe side, I said you would let him

have something on account tomorrow."

New Observatory At Toronto Will House Giant Telescope, Largest In The British Empire

Natural Weed Choker

Weeds Cannot Thrive Where Crested Wheat Grass Is Sown

As fully explained in the House of Commons recently by the Hon. Robert Weir, Dominion minister of agriculture, crested wheat grass is well adapted for pasturing by virtue of its remarkable ability to withstand close grazing and severe trampling. It is a particularly suitable crop for feed production on the dry land areas of Western Canada on account of its adaptation to dry conditions, its winter hardiness, and its ability to compete successfully with plants of other species. Seeding is believed, and an abandoned field in the vicinity of the Dominion Range Experiment Station at Morden, Manitoba, Alberta, shows that to this grass was closely grazed from early spring until late fall for five continuous years without apparent injury to the grass cover. The soil was heavily infested with weed seeds, chiefly Russian thistle and mustard, yet the grass took possession to the almost complete exclusion of the weeds. Owing to its extensive root system which takes up all the moisture, weeds cannot grow in competition with it. All the latest information about crested wheat grass is contained in a pamphlet just issued by the Dominion Department of Agriculture.

About Punctuation

An Art, Like Spelling, That Few Ever Master Completely

Lord Dunsany has been discouraging on punctuation. Very few people can punctuate properly. Many have an idea that period is best indicated by a dash, and several poets who send contributions in this direction have dashes scattered all over their manuscript instead of commas, semi-colons, periods or other points.

Punctuation, like spelling, is a gift, and few ever master the art completely, while novices hardly ever gain control of colons, notes of exclamation, and quotation marks. — Hamilton Herald.

Notwithstanding two disastrous hurricanes, bananas remained in 1933 Jamaica's principal item of export. Her two principal markets are Canada and Britain. At one time the chief importer used to be the United States.

In the near future, Canada will have the largest telescope in the British Empire, and one of the most modern observatories in the world. The observatory property will be located at Richmond Hill, north of Toronto, in a 377-acre park.

This plant with its up-to-date machinery and giant telescope, is expected to reveal to Canadian astronomers many new secrets of the stars. Constructed and equipped under the supervision of Prof. C. A. Chant, head of the astronomy department of the University of Toronto, the observatory will shortly be ready for use. It will then be turned over to the university by Mrs. D. A. Dunlap, the donor, as a memorial to her late husband, a prominent missing man.

The dome and building are now practically completed, and part of the telescope is being set in position. A large English telescope works has been finishing the main reflector for some months. This, too, will be in place shortly.

Inside a huge steel dome will be located the telescope with a 74-inch reflector, the entire assembly weighing around 50 tons. The steel dome is 61 feet in diameter, with a parallel opening 15 feet wide. The moving shutters, running on rails at the top and bottom of the dome, close the opening, and are operated simultaneously by means of wire ropes connected to a motor gear. An emergency hand gear is also provided. Two motor-operated wind screens of sail cloth are mounted in the opening, one rising to the bottom, the other descending from the top.

The dome, which weighs about 80 tons, is carried on 24 canted rollers of 27-inch diameter, mounted in ball bearings and running on a rail. Sixteen pairs of lateral roller bearings on the inner and outer edge of the rail keep the dome in position. Two segmental platforms, the lower one at the base of the opening and the upper one at the back 15 feet higher, are fixed inside the dome. Rafts are mounted on the parallel straight edges on which runs a bridge five feet six inches wide and divided into two portions, the right hand side forming a staircase, the left being a track on which a truck carrying the Newtonian observing platform runs.

The centre section of the telescope tube itself is a steel casting seven feet in diameter and weighing 5½ tons. Just above the lower flange the casting swells out to eight feet seven inches to accommodate an iris diaphragm for use in stellar photography.

Construction of the diaphragm is similar on a big scale to that of the familiar small camera. But the shutter of many cameras is less than one-half its diameter. The shutter of the Dunlap observatory camera opens to six feet, two inches. It is operated by a hand wheel.

Prof. Chant is enthusiastic on the possibilities of discovery and development in the science of the heavenly bodies to be afforded by the new observatory.

Herb Garden Is Useful

Idea Seems To Be Gaining Popularity In Canada

The herb garden is rapidly becoming a Canadian institution. All sorts of English favorites are found to grow well in Canadian soil. The best place to plant the herb garden is right outside the kitchen door where it will be handy for the picking. Herbs that add spice to the cooking and that are easily grown in the average back yard are: Tarragon, mint, chives, marjoram, sage, parsley, leeks and various other members of the onion family.

Streamlining Saves Coal

Streamlining has come to naval architecture. Appearance of the Arctic, second of two British tramp steamers to be built on the streamlining principle, in Boston harbor, caused widespread interest along the waterfront and elicited the information from her captain, Keith Williams, that his ship burned five tons less of coal per day than other steamers of a similar class.

MAKE YOUR FALSE TEETH HOLD FAST

Eat, talk, sing and shout and never fear embarrassment. Your false teeth stick all day long when you remain on Dr. Dugdale's Power Hold. They're so snugly—comfortably—they can't slip. Prescribed by world's leading dentists — they know it's the best! Costs but little—say druggists.

WORLD HAPPENINGS BRIEFLY TOLD

Getulio Vargas, provisional president of Brazil, was elected the first constitutional president of the second Brazilian republic.

Great Britain and the United States have decided to suspend bilateral conversations preliminary to the 1935 naval conference for the remainder of the summer.

World powers were disengaged to another serious ring at the official convocation of the steering committee of the disarmament conference.

As result of improved business a firm of construction engineers at Dursley, England, is giving a week's holiday with full pay to 2,000 workers.

The Royal Academy of Music announced awards to two Canadians. The Alfred J. Whaley prize for violin went to Eugene Nemis, Winnipeg, and the Acton-Bond prize in drama to Alice Lumsden, Victoria.

Turkey, through her ambassador, formally expressed her deep regret over killing of Surgeon-Lieut. J. W. Robinson and wounding of Lieut. T. A. K. Maunsell of H.M.S. Devonshire by Turkish sentries recently.

A stratosphere torpedo capable of taking off by an electric charge and travelling through the upper ether at enormous speed, directed by wireless to its target, has been invented by the young Japanese inventor, Unedo Chiba.

Miss F. M. Douglas, of Winnipeg, co-author of the satire "Britannia Waives the Rules," returned to Canada recently on the liner Alumnia. Miss Douglas, though she wrote the book about England some time ago, had never seen that country until the present trip.

Nineteen horses were recently shipped from Canada to George Knox, of Westerhill, Bishopbriggs, near Glasgow, Scotland, the department of agriculture announced. They were the first horses sent to the British Isles from the Dominion since the war. Nine were from Western Canada.

Where People Are Natural

New York Man Wants To Get Back To Tahiti

A Canadian Press letter says: To J. A. McLaughlin, paper-engineer-in-chief, New York, a ghoulish city of shadow, its streets paved by people wearing masks, acting parts. Homeick, McLaughlin came back from Tahiti, where he went to gather material for a book about the South Seas.

Now he wants to get back in his 40-ton ketch to "where people are themselves." Says he of Tahiti: "There the people wear no masks. Even the whites after several months drop brown and other facial affectations and become natural—or unnatural, as you prefer."

"She—is that a popular song he is singing?"

He—"It was before he began singing it."

A seventy-year-old woman of Crewe, England, has made 2,000 garments for the unemployed.

Engineers Meet

Trend Is Unmistakably Towards Better Things, Says Speaker

In the field of engineering the trend is unmistakably toward better things, Harrison P. Eddy, Boston, president of the American Society of Civil Engineers, told that body and the Western professional gathering of the Engineering Institute of Canada when he addressed the opening session of the four-day convention of the two organizations at Vancouver.

"It would be presumptuous for me to comment specifically upon trends of engineering in Canada," said Mr. Eddy, "but I would not be loyal to the Engineering Institute of Canada, of which I have the honor of being a member, if I did not give public recognition to the splendid work which it has done in upholding and advancing the profession."

He suggested more frequent and closer co-operation between the Engineering Institutes of Canada and the American Society of Civil Engineers.

Civil engineers from all parts of the continent attended the dual convention.

988
GO MEXICAN IN GAY COTTON SPORTS PRINT DRESS

Stretch your "budget"—it's easily made.

In multicolored seamstitcher check, it would look as youthful trimness and its simplicity.

This model can also be carried out in tulip silks, plain pastels or shirting in.

In striped shirting cotton, it's also snappy. Cut the attractively shaped girdle, cap sleeves and the jabot that slips through shaded openings in front. Attach the strips in the opposite direction of run diagonally.

Contrasting effects can also be worked out in this way as white linen with matching blue, or yellow and white dots, plus white stripes.

Style No. 988 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 3 1/4 yards of 36-inch material with 1/4 yard of 27-inch or wider contrasting.

Price of pattern 20 cents in stamp or coin (coin is preferred). Wrap coin carefully.

Little Journeys In Science

THE PLANT FACTORY

(By Gordon H. Guest, M.A.)

Scientists have been attempting for many years to find out how plants manufacture such complex materials as cellulose, starches, sugar fats, proteins and vitamins, and it has been found that every plant contains a little factory in which there is built from the raw materials these products which are so essential to man's existence.

It is in the green leaf that this wonderful process takes place. The raw materials consist of carbon dioxide, water, and minerals from the soil. Carbon dioxide is a gas which enters the leaf through the extent of three to four pores in ten thousand pores of air. This gas enters the leaf through very small openings on the surface. The minerals must be soluble in the water which comes up to the green leaf through the roots and stem from the soil. Chlorophyll, the green coloring matter in plant leaves, plays an important part in this manufacturing process. Sunlight, too, is employed, furnishing the energy which converts the raw materials into compounds such as starch and cellulose. The presence of chlorophyll is always necessary to the process, which is known to scientists as photosynthesis, coming from the Greek word meaning "to build up by means of light."

Directly or indirectly all life is dependent on these minute plant factories. Here the plant produces its own food, and from the factory this food is sent to other parts of the plant for storage. Animals live on plants, and man in turn requires the meat of animals in his diet, thus closely associating man's existence with the stores of food which are built up through the process of photosynthesis. Further, we are dependent on it for food, coal and oil. On these in turn depend steam power, motor transportation and other important factors in our civilization.

For many years scientists have attempted to duplicate in the laboratory this process which is carried on in the green leaf, but as yet attempts to do so on a practical scale have met with failure.

Recipes For This Week

(By Betty Barclay)

CHOCOLATE ICE BOX CAKE

4 squares unsweetened chocolate
1/2 cup sugar
Dash salt
1/4 cup hot water
1 egg
1 teaspoon vanilla
4 egg whites, stiff beaten
1 cup cream, whipped
2 dozen lady fingers

Melt chocolate in top of double boiler. Add sugar, salt, and water, stirring until sugar dissolves, and mixture is blended. Remove from boiling water; add egg yolks, one at a time, beating thoroughly after each addition. Place over boiling water and cook 2 minutes, or until thickened, stirring constantly. Remove from boiling water; add vanilla and fold into egg whites. Chill. Fold in whipped cream. Line bottom and sides of mold with lady fingers. Turn chocolate mixture into mold and place remaining lady fingers on top. Chill 12 to 24 hours in refrigerator. If desired, add 1/4 cup finely cut walnut meats to chocolate mixture before turning into mold. Unmold. Serves eight.

FRUITADE
(Individual Service)
2 tablespoons crushed pineapple
or pineapple juice
1/2 cup orange juice
1/2 cup water
1 tablespoon sugar
1 tablespoon lemon juice *

Drain pineapple, if canned, but do not extract all juice. Add lemon and orange juice, water and the sugar. Strain and serve very cold.

Through the vigilance of the Entomological Branch, Dominion Department of Agriculture, two serious pests were prevented from entering Canada this spring, namely, the gold-tailed moth and the black vine weevil, both from Holland.

SUNDAY SCHOOL LESSON

JULY 29

MICAHIAH SPEAKS THE TRUTH

Golden text: "What the Lord saith unto me, that will I speak." Kings 22:14.

Lesson: I Kings 22.

Devotional Reading: Psalm 119: 9-16.

Explanations And Comments

Ahab and Jehoshaphat, Allied Against Syria, verses 1-4. For three years, from the time of the covenant made with Ben-hadad, king of Syria, whom the Israelites had so severely beaten (Kings 20:20-22), there had been peace between the Northern Kingdom of Israel and the Kingdom of Syria.

Meanwhile Israel and Judah had been friendly, as proved by the marriage of Athaliah, the daughter of Ahab, king of Israel, and Jehoram, the son of Jehoshaphat, king of Judah. It was now that Ahab had become a vassal of Israel, for in our chapter to-day and again later (2 Kings 3:7-12) the king of Judah is seen aiding the king of Israel in the wars which Judah herself had no interest in.

Ahab had reminded his followers that Ramoth in Gilead (east of the Jordan north of the Jordan) had belonged to the kingdom of Israel, but he had been seized by the Syrians. After Israel had defeated Ben-hadad, king of Syria, the latter had promised to return to the city of Gilead. His father had seized it, so Ahab had to keep it.

Ahab and the Prophets of Israel, verses 5, 6. It was after Jehoshaphat had promised Ahab that "we shall be delivered by the hand of the Lord" that he asked Ahab to ascertain through the prophet the will of God in the matter. Ahab summoned four hundred prophets and they all agreed that he should deliver the city to Ahab's hands.

Ahab and Micaiah, verses 7-28. Jehoshaphat would make assurance doubly sure, and if there were yet some other prophet, there was Micaiah, the son of Imrah. Ahab admitted, but he hated Micaiah, for he always prophesied evil. Jehoshaphat, to help him anticipated, nevertheless, that Ahab would be defeated.

The two kings in royal robes were sitting on their thrones on the broad open space before the gateway of the temple, the place of public assemblies before which were all the prophets prophesying the defeat of the Syrians. One of them, named Zedekiah, had made horns of iron and said, "With these shall I drive the Syrians from before you." When Micaiah appeared, the messenger who had gone for him urged him to prophecy good even as the other prophets had done, but Micaiah had stoutly asserted that he would prophesy only that which Jehovah told him.

When Micaiah approached the two kings, he said, "I see in Ramoth-gilead battle, or shall we forbear?" "Go up and prosper, and Jehovah will deliver it into the hands of the king," said Micaiah. Jehovah spoke through the words of the four hundred. But when Ahab sternly said, "How many times shall I adjure thee that thou speakest unto me nothing but the truth in the name of Jehovah?" Micaiah replied, "I have seen what Jehovah has had, of the tribes of Israel scattered on the hills of Gilead like sheep that had lost their shepherd. And I have heard no voice saying, 'Thou mayest not do this,' let them every one to his house in peace." 2 Chronicles 18:16. "Did I not tell you?" said Ahab to Jehoshaphat, "that he prophesied evil?" In that vision, Micaiah continued, he saw the king enthroned in heaven surrounded by the four hundred. But when Ahab, the debauched with his host, had turned to him and said, "Is not this thy servant Micaiah, whom I have despised?" he was seized by the spirit of Jehovah, and he uttered his prophecy.

Stalm-Gilead Attacked and Ahab Slain, verses 29-36. Ahab asked Jehovah whether he would be successful in his battle, but he did not say so. With strict orders to kill the king of Israel, the chariots pursued Jehovah, but desisted when it was clear that he was not the king of Israel. A horn of divine judgment was pierced between the joints of the armor Ahab was wearing, and gave him his death wound.

Had Answer Ready

An Israelite having accidentally broken a pane in the window of a house, ran away as fast as he could. He was followed by the proprietor, and seized.

"You broke my window, fellow, did you not?" asked the proprietor.

"To be sure I did," said Pat, "and did you not see me running home for the money to pay for it?"

The rhododendron white fly has been found infesting a few nurseries in the vicinity of Vancouver and Victoria, B.C. This constitutes the first record of the pest in Canada and steps have been taken to eradicate it.

Memorial Church In

Baghdad Is Proposed

To Honor British Killed In Mesopotamia During War

An appeal for \$30,000 to build a Mesopotamian Memorial Church in Baghdad is signed by the Archbishop of Canterbury, Sir Francis Humphreys, British ambassador in Baghdad, and others.

The building which has been used as a church since 1921 was originally a Turkish guardhouse, and will shortly have to be demolished owing to town-planning developments, and the construction of a steel bridge across the River Tigris. The British community in Baghdad, numbering some 400, is anxious for a permanent church, and a site has been acquired.

It is suggested the new church should be built as a memorial to the 41,115 British lives sacrificed in Mesopotamia during the war, and to those killed in Iraq. The building would include a memorial shrine containing a book inscribed with the names of those British men and women who gave their lives on Mesopotamian soil.

"Why does a red-headed girl always marry a quiet fellow?"
"She doesn't. He just gets that way."

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

HEPBURN PAVES WAY TO RECEIVE HUNGER PARADE

Toronto.—Notice was served on the city of Toronto that its police commission must not pursue a policy at variance with that of the Ontario government. In the last days of the session between Queen's Park and the city hall the government removed two members of the Toronto police commission and replaced them by two others.

The new commissioners are expected to rescind the order banning a parade and demonstration of hunger marchers from Ontario centres in Toronto on July 30. Mayor William Stewart, who has been almost continuously in controversy with Premier Mitchell Hepburn since the new Liberal government took office, is ex officio chairman of the commission. To-day he will find himself flanked on either side by a commissioner appointed by the Liberal government.

"It can hardly be expected," said Hon. Arthur Roebuck, attorney-general, "that appointees of the government shall remain in office while defiantly announcing a procedure openly contrary to the settled policy of the government."

The new commissioners are Frank Denton, K.C., prominent Liberal, and Judge W. T. J. Lee, of the county court of York. They replace J. R. L. Stark, K.C., and County Judge James Parker.

The city police commission passed an order banning any parade or demonstration of hunger marchers in Toronto while Premier Hepburn was asking provincial police to accord the marchers every courtesy and promising to meet their representatives. When Mayor Stewart heard the premier had promised to appoint an official to confer with city police authorities with a view to co-operation in facilitating the march he accused the government of interfering in city affairs and declared he would uphold the police commission and defend the rights of the city to the limit.

The premier and the attorney-general retorted by charging the mayor with attempting to prevent a group of citizens appealing to the government, called him a tyrant and accused him of trying to throttle free speech and set an armed police force on a body of innocent citizens.

The Manitoba government will make no grant towards the maintenance of delegates to the proposed "hunger march," Hon. David Croll, minister of welfare, told a committee of the hunger marchers.

Rains Continue In Poland

Flood Toll Mounts And Many Bridges Carried Away

Warsaw.—Floods in southern Poland which counted at least 53 victims, mounted as heavy rainfall continued.

Now, at the juncture of several rivers, was the latest city threatened.

Two trains of sappers were hurrying with pontoons from Krakow to Stary Sacz, where 17 young men took refuge on a dry peak when a labor camp was invaded by the roaring waters. Communications between Krakow and Lowicz were cut and more than 12,000 feet of bridges carried away by the swollen streams.

Want Henderson To Resign

London.—The resignation of Arthur Henderson from his post as secretary of the Labor party, will be demanded at the party's annual convention in October by the Putney and Harrow committees. These two London suburbs feel that Henderson has deviated himself entirely to the disarmament conference of which he is president.

Confer With Dominions

London.—Conversations between the government of the United Kingdom and the Dominion governments in regard to the projected 1935 naval conference are proceeding through normal channels. The House of Commons was informed by Stanley Baldwin, acting prime minister,

Seed Officials Meet

Conference Held At Saskatoon Is Well Attended

Saskatoon.—Further standardization of the work of the federal seed branch inspectors in the four Western provinces was accomplished as the result of a three-day conference of all the inspectors from Fort William to the Rocky Mountains which concluded here. Meeting with the federal men were the field men connected with the branch of the Saskatchewan department of agriculture.

The conference took the form of a short refresher course in cereal grains identification of varieties and variations within varieties and the identification of disease that attack cereal crops.

Work of the conference was directed by Nelson Young, Saskatoon; G. M. Stewart, Calgary; J. E. Blackburn, Winnipeg, district inspectors for the federal seed branch; and by S. H. Vigor, field crops director for the provincial government.

The historical background of plant breeding was outlined by Dr. J. B. Harrington, professor at the University of Saskatchewan, who pointed out the necessity for seed growers to maintain the purity of strains in their plots. Mr. Harrington also spoke upon the identification of varieties of cereals, and the separation of any kinds of crosses that might be found in seed grain plots.

He emphasized apparent changes which different environmental factors cause in varieties and advised the inspectors to take account of these changes in making judgment upon the purity of the strains grown. He showed how cross pollination of varieties soon grew close together might come about, pointing out that the results from crosses of this kind were as disastrous to pure strains as sowing two varieties of seed in the same plot.

Explorer Thought Lost

Hop Abandoned For Young Britisher Who Attempted To Scale Mount Everest

Darjeeling, India.—Hope has been abandoned for Maurice Wilson, young British flying officer, who started out on an ambitious attempt to conquer Mount Everest.

Wilson flew an airplane to India from England with the hope of planting a Union Jack on the summit of Mount Everest. The authorities here vetoed his plans, so he decided to attempt the climb which has yet to be achieved.

Wilson progressed for some days until he established his camp No. 3 high on the slopes. He left his porters there and continued the grim climb alone, taking a small tent, an ice-axe and a quantity of food, with a camera.

He was last sighted high up, nearing the location where he proposed to establish what he called camp No. 5.

His porters now have waited for three weeks without any word from Wilson and they returned to Darjeeling to report their conviction Wilson had lost his life.

Still Paying One-Third

Alberta Making No Change In Direct Relief Costs

Edmonton.—One-third of the direct relief costs will continue to be paid by the province, notwithstanding the action of the Dominion government in cutting to 25 per cent. A decision to this effect was reached at a cabinet council meeting and has been sent to Mayor Knott, of Edmonton, and Mayor Davison, of Calgary.

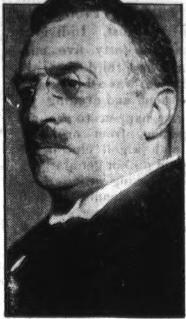

No time limit has been set for this rate to apply. And it will, therefore, continue indefinitely, it is learned from Premier Reid.

Action has also been taken by the government on Edmonton city council's request for a federal loan of \$1,000,000 for public works, approving the loan and agreeing to make application for it to Ottawa.

More Cars Produced

Ottawa.—Automobile production in Canada in 1933 amounted to 65,852 cars, with a sales value, f.o.b. plant, of \$38,430,463, the Dominion bureau of statistics has announced. This was an increase of 8.3 per cent in number but only 2 per cent in value from 1932.

CAPTURED BY BANDITS

Here is Sven Hedin, noted Swedish explorer and author, who reportedly has been captured by a brigand Moslem chieftain, General Ma Chung Ying, and a group of Turkistan bandits, in the wilds of Sinkiang province.

Argentina Wants Wheat Export Quota Raised

Agricultural Minister Says Large Crop Makes It Necessary

Buenos Aires.—Argentina's ministry of agriculture proposed that the nation's wheat export quota be raised at next month's international wheat conference to 150,000,000 bushels. At present the quota is 110,000,000 bushels.

A communiqué by the agricultural minister stated there is a growing market in China for Canadian merchandise, but Canadian business men, in order to develop that market, must pay greater attention to its potentialities and keep closely in touch with it.

The trade commissioner left for Ottawa and Montreal.

New Arms Treaty

Japanese To Confer With Washington In August

Washington.—Japanese spokesman will visit Washington next month and will seek, by informal conferences, to prepare for the negotiations of a new naval arms limitation treaty in 1935.

These discussions are generally expected to include:

An effort by Japan to obtain a new understanding on respective positions and purposes in the Pacific; later to be extended to Great Britain.

The continuing Japanese quest for a bigger navy in proportion to Britain and the United States than is allowed by the present 5-5-3 ratio.

An attempt to forward the Japanese project of a non-aggression pact with the United States.

WILL MEET TO DECIDE FATE OF WHEAT PACT

Washington.—Three nations which are parties to the international wheat agreement moved to decide the fate of the compact which seeks to limit world wheat production and raise world prices.

The United States, Australia, and Canada, principal exporters of the bread grain, requested that a meeting be held August 14 at London to attempt to reach a "complete understanding" on the agreement for next year. They left the intimation they would seek a show-down on the position of Argentina, fourth principal signatory.

Evidence to support this belief came in the guarded statement of departments of agriculture officials that they were withholding final decision on domestic wheat curtailment plans for next year pending outcome of the August meeting.

In requesting the London meeting next month the three countries, in a joint letter to Andrew Cairns, secretary of the conference, declared they attached utmost importance to maintaining the agreement and would make every effort to do so.

Minneapolis, Minn.—World wheat affairs were discussed here by representatives of the Canadian and United States departments of agriculture.

The meeting was preliminary to the World Wheat Conference in London, which starts Aug. 25, and was to determine what Canada and the United States positions would toward continued wheat acreage reduction and if possible arrive at a unanimity of purpose.

Participating in the conference was Chester Davis, administrator of the agricultural adjustment administration; Dr. Mordechai Ezekiel, economic adviser to Secretary Henry A. Wallace, of the United States department of agriculture; Dr. C. T. Grant, of the department of agriculture of Canada; C. W. McFarland, manager of the Canadian Wheat Pool; G. E. Wheeler, Paul Nichaus and George Eastbrook, of the United States department of agriculture; and F. E. Murphy, of Minneapolis, delegate to the London and Rome wheat conferences.

At the London wheat conference, when a world-wide acreage reduction programme was launched, Canada and the United States stood together on most of the reduction programme and it was anticipated that a preliminary plan for the two nations would be worked out.

Text Of Subsidy Bill

London.—The text of the government's bill to aid the domestic cattle industry was issued here, revealing that imported cattle must be in the United Kingdom for a continuous period of at least three months if the subsidy on slaughtered beef cattle is to be paid. The government is setting aside a sum of \$15,000,000 to subsidize domestic cattle producers.

Noted Sculptor Dead

Montreal.—One of Canada's most noted sculptors, George William Hill, 72, died July 17, in his suburban Outremont home after an illness of 10 days. Among his best known memorials are the nurses' monument in the Hall of Fame at Ottawa; Queen Victoria's Jubilee monument in Victoria Square, Montreal, and the Sir Georges Etienne Cartier monument on Fidler's Field, Montreal.

Unique Phone Call.

Marking another striking innovation in telephonic communication, Alberta Government Telephones last week put thru a telephone call this week from Jasper to the C.P. liner Empress of Britain, crossing the Atlantic from Quebec to Liverpool. This is the first time such a call has been put thru.

Spruce Grove News.

Mrs S Shields and Mrs Martin arrived from Breslau, Ont., last week, and are now spending a short holiday with Mrs Dan Brox.

Mr and Mrs Philip Schram accompanied by a few friends are at present on a motor trip to Wembley.

Messrs F J Forbes and Reg. Pinchbeck are spending their vacation fishing up at Cold Lake.

Mr Carl Lyuk, Edmonton contractor, has been awarded the contract for the erection of a school building for Spruce Grove High School District. Work will commence at an early date.

Mr and Mrs Fred D Goebel were Sunday visitors in Stony with Mr and Mrs E H Baron.

That Capt. Gibson has been making climbing records is shown by the following press despatch from Eremite Valley: "Led by Capt. Gibson, a party has just accomplished a first ascent of Anchorage Peak

Accident Near the Grove.

An accident which might have had more serious consequences happened on Sunday afternoon just west of Spruce Grove school. While a Plymouth Sedan driven by a local farmer was trying to pass a 1-horse buggy driven by Mr Hauer, another local farmer who lives north of the school, the driver of the car evidently misjudged his distance or else the buggy driver swerved onto the path of the passing car.

In trying to avoid an accident, the motorist took to the ditch, but caught the hind wheel of the vehicle, overturning the latter.

The buggy driver was accompanied by Mrs Hauer and two children. None of these were hurt seriously, altho Mrs Hauer required the services of a physician.

The occupants of the motor car escaped with few bruises.

which overlooks the Alpine Club's camp."

A very successful Mission-fest was held Sunday last at St Matthew's Church, Spruce Grove. Pastor G Poetzsch was assisted at the services by Rev J Bergbusch, of New Sarepta, and Rev E Buehler, of Flatbush.

Among the many fine looking wheat crops in this district none are more noticeable than the Elephant Brand fields, where this well-known fertiliser has been used. Among these are the wheat fields along the Highway of Mr J H McLaughlin.

Edmonton Bulletin: "Theft of \$85 from his pockets during a party was reported to the police by Edward Loian, a cattle buyer from Spruce Grove."

Mrs D Brox was one of the hostesses at the Old Timers' cabin at the Edmonton Exchange on Friday, when many friends were entertained at tea.

During the month of August Spruce Grove congregation will worship with Stony Plain every Sunday morning at 12 o'clock. There will be no service at Spruce Grove during August.

"I incited that our fleet of 'LIFE SAVERS' CARS' BE EQUIPPED WITH FIRESTONE TIRES!"

FOLLOW the example of fleet owners such as Life Savers Ltd., whose Vice-President, M. L. Hause, learned from actual experience and careful cost records that Firestone tires give the most dependable and economical mileage.

Put Firestone tires on your car now and get the full benefit of the extra Firestone features that give 25 to 30% longer tire life at the same cost. See your nearest Firestone Dealer today.

CHEVROLET TRUCK SALES LEADERSHIP

This chart, based on the official new Commercial Car Registrations in Canada, Jan. 1 to May 31, 1934, proves Chevrolet's leadership in sales over all other trucks.

CHEVROLET	34.9%
TRUCK B	32.3%
TRUCK C	9.8%
TRUCK D	9.1%
ALL OTHERS	13.9%

WISE truck owners keep a sharp eye on costs. Their exact records prove which trucks cost less to run. That explains why big fleet operators and thousands of single-truck owners have been switching to Chevrolet. They know that Chevrolet Trucks and Trailers save them money on gas, oil and upkeep! They know that Chevrolet gives smooth performance and plenty of power without needless extra cylinders! They know that Chevrolet offers a complete choice of sales-leading models from $\frac{1}{2}$ to 2 tons capacity — at Canada's lowest prices for any six-cylinder trucks! Easy GMAC terms.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter can earn enough to support Camilla and his mother. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is a simple, unlettered girl from a small family. She is not to inherit money when she comes of age and so is starting a commercial art in the hope of finding an agency. One day in the story is Avis Werth, another twenty-one girl who is trying to win Peter's heart. Avis is the daughter of Camilla's Mother, his estranged roommate whom with whom he has quarreled. After a party at an exclusive club where the rest of the members of the Ansons' set are present to continue the party, Peter and Camilla sit on the beach by themselves and fall asleep on the sand. When they awoke it was morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are engaged. Peter urges Peter to accept some of her earrings to help him alone, but Peter refuses and they quarrel. After Camilla goes home, Peter receives a wire from Avis Werth calling and pestering Peter to accept a loan of \$1,000. Peter finds his exhibit and asks Avis and Camilla to come and look at it for him. "Camilla," says Avis, "is eager Youth," and "Avis," Inspiration." Peter adopts the latter title and Camilla the former. They go to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned off they see the studio has been shattered. Peter is shocked, accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, flees.

At Camilla's suggestion, Peter turns at his exhibit a statue he had sculptured especially for her as a wedding gift. They name it "Love of Hope."

Camilla's advertising campaign was a success from the beginning, and it was arranged to have radio broadcasts, newspaper stories, magazine advertising, Camilla to both write them Tiny Tots stories and to deliver them over the radio.

(Now Go On With The Story)

CHAPTER LIII

It was Avis who first learned the news, even before Peter himself. She had arranged with John Danforth that he should telephone her the result of the committee vote, immediately. To Peter Anson was awarded the Paris scholarship.

Avis was speechless with surprise, much as she had planned and hoped for that very thing. But those plans and hopes had done a right about face on the night when "Inspiration" was destroyed, and she had been progressing steadily toward another goal since then.

"You wouldn't just wish me, Uncle John?" she asked incredulously.

"Of course not, child. But I will admit that my vote must have been the deciding factor, because he won by just one point. The nude figure 'Flight' by someone named Nels Nelson, was his best rival, but I can honestly assure you that it wouldn't have been my choice had the other

been done by a cannibal in the South Seas. In my opinion, the immigrant group was far better, and one of the two best. So I do hope that you are happy about it, my dear."

"So happy that I am sending you a kiss over the wire, to do until I see you. Get it?" jubilantly. "And now, I must tell Peter. Thanks a lot for calling me, Uncle John."

She dashed across the hall, rapped on Peter's door the three little knocks, a pause, and a fourth one, which was her customary neighborly signal. No response. She repeated the signal more insistently, but there was no reply. Her enthusiasm sank like a rock into a pond. She had purposely asked her maid to telephone at once, so that she might be the first to tell Peter the news, whatever it might be.

She recrossed the hall, dejectedly, entered her room slowly and left the door standing open, so that she might hear Peter as soon as he returned. Perhaps he had gone only to the corner on an errand.

But Peter was not waiting resignedly in his studio for a delayed message concerning the winner of the Paris scholarship. He had not expected to be the fortunate one, but he had not yearned toward one goal for four long years to guess any longer than necessary who might be that one. Having finished with his afternoon class at the museum, he waited there until the announcement was made public concerning the exhibit.

He was in Professor Drake's office, discussing the merits of the entries when the professor's secretary came into the room with her face aglow as if she might have been awarded the prize herself. She went straight over to Peter and held out her hands with delighted enthusiasm.

"I always you would do it, Peter Anson! May I be the first to congratulate you?"

"Peter?—what?" Peter demanded stupidly, as if there had been no possibility of a cause for congratulation. "It has paralyzed him, already. He can't speak; can't even remember that the annual national exhibit has reached its climax. He will have to snap out of it, if he expects to reach Paris."

"Well—well, my boy," Professor Drake was slapping him on the back and pumping his hand by this time. "Of course, we knew you could do it. And when I saw your entry, I fully expected it."

"But—I don't understand," Peter was still dazed and incredulous. "You don't mean that I won the scholarship with that immigrant group?"

"We don't expect you to swallow it all at once, little boy," Ann Carter, who had seen much of him during his long association with the professor, chided him. "Take it easy—a word at a time: Peter—Anson—is awarded—the Paris—Scholarship—in the—National—Exhibit."

"All I've got to say is, he doesn't deserve it," Peter roared suddenly, and his sunny face broke into such a smile as it had not worn since his wedding day. "In more ways than one, what I mean. Well, thanks folks, for the compliment and all, but I'm off to tell my wife the good news!" And his legs began to move out of the room as if he were discharged from a canon.

He was waiting at the entrance of the building where Camilla worked, when she emerged a few minutes after five o'clock. In one leap, he was beside her, holding her hands and telling her all in one excited breath, "Camilla, I did it—I mean we did it."

"Did what?" she asked, bewildered, but already absorbing the joy which emanated from his whole being.

"The prize—Paris—the immigrant group. You made me enter it—darling!" he explained incoherently.

"Peter—not really?" she gasped.

"Absolutely! Here—where can we go to talk—shall we go somewhere for dinner—here, taxi," he summoned a passing cab. And presently, they were settled in the tonneau, holding hands, and they were riding out toward Charm Cottage, the favorite rendezvous of their special celebrations.

"Can you believe it?" he demanded, when they were facing each other across their favorite window table.

"Of course, I can. I might have

expected it more, except you were so terribly sure that you hadn't a chance, darling. Oh, Peter, isn't it just too wonderful?"

"Not too wonderful to me," he drew a long breath of satisfaction, beginning to realize that his fondest dream had come true. "Now you just watch your husband make good. Nothing is going to stop me, not if I know it. I am going to work as I've never worked before! Think of it, Camilla—Despina, the Trocadero, all the masters and masterpieces of the world to study with and work from. Paris! this index of art and artists!"

"I'm so glad for you, dear Peter," she said softly, and earnestly, then a wistful tone crept into her voice, as if she were joking. She would not make Peter feelretched about leaving her. She had to be gallant about it. She had made this very provision, herself, when she married Peter; that if he had the good fortune to go to Paris, she would wait at home for him and take care of herself. How simple an obligation the last was!

His face sobered, also. "I know. Always something to cloud up a blue sky," impatiently.

"We'll just have to ride over the cloud like good sports, and come out in the sunshine again to make the most of it," she encouraged him cheerfully, while her heart yearned to hold him with her.

"I'd be any good, I should manage to do enough to take us both—" he began tentatively.

"And worry about our double obligation until you couldn't make the most of every precious minute you have available. No, Peter, you will go to Paris, and I will go with you, and you never see me, or rather just as you would had we not married. You will be free, unhampered with obligations, free to give every bit of your time and yourself to your work. You will take my love, with you and our memories, and you will return to me a bigger, better man," she managed through her voice firm and practical.

"Well," he faltered, "to be all kinds of a thief I drag you away from your work now, when everything is breaking big for you and you are earning more than I'll be able for a couple of years, at least—perhaps, ever."

Again, he had turned her generous contribution her happiness toward his career, back to a selfish desire to proceed with his own success and its reward. It hurt her cruelly, but she reasoned that if it were the only way to relieve Peter of his sense of obligation to her, that was the way to leave it. There was no way to convince him that she would rather be wedgedishly with him in Paris, or anywhere, than to enjoy the fruits of her own achievements, alone. Besides, if he needed help, she wanted to be able to extend that help—if he became ill, or any of the unexpected misfortunes without which death.

Paris—the thought was still separated by a lightning bolt, a costly journey, a world of differences.

While she shrank that year was going to be—if ever did come to an end! But there was one minute consolation which encouraged her. Peter also would be three thousand miles away from Asia, not across the hall. It wasn't that she doubted Peter, but a man was so helpless at the mercy of a woman like Avis.

(To Be Continued)

Playing Safe

Of course there is nothing to the old superstition about bad luck attending ships that sail on Friday the 13th—but no passenger liners put out from Montreal harbor this Friday, July 13. They feel the same way about it in the Old Country and no passenger ship sailed that day for Canadian ports.

**YOUR LIVER'S MAKING
YOU FEEL OUT OF SORTS**
Wake up your liver like this

—No Calomel needed

When you feel blue, depressed, worn on the nerves, or feel like a dead weight, drink two daily pounds of liquid Calomel with your breakfast.

Digestion and elimination are being slowed down, and you feel tired and listless. You and mother feed you with Calomel.

You are making you feel weak, listless, and inactive. Calomel is a mineral water, laxative, diuretic and emetic, gunpowder, and a liver stimulant.

Carter's Little Liver Pills is the best one. Take Purley's Liver Pills, or any other Calomel substitute. 25¢, at all drugstores.

CHRISTIE MOTORISTS HAVE COME BACK TO STONY PLAIN.

After a 6000-Mile Peregrination, Stony's Long-Distance Motor Party Returns, Safe and Sound.

Much to the surprise of everybody, the Christie motor party returned to town on the afternoon of the 20th. The party consisted of Mr and Mrs Christie, George and Viol, The party left here on May 9th, and in their 71 days of perambulating they visited with relatives in several of the Coastal cities on both sides of the boundary.

They visited, in turn, Portland, Tacoma and Seattle. At the latter place, after a protracted stay with relatives, they had some difficulty in making their getaway, their friends there being so insistent on their staying longer. Seattle is the city in which Mr Christie had been a one-time resident.

Several of the former residents of Stony Plain district who are now living in Portland and its suburbs were visited, and the delight of these was unbounded seeing old friends from hereabouts.

On coming back across the International boundary Vancouver was visited, and, following this, the car was taken by ferry over to Victoria, where an uncle of Mr Christie's was called on. From there a trip was made up the Island to Shawinigan Lake, where Mr and Mrs Jac Janzen, former residents of Stony Plain, now reside. Mr Janzen has a position in a mill, is doing well, and wished to be remembered to his old friends here.

A particularly pleasurable part of the trip was on coming up thru Yakima, where the fruit was found in abundance, and the younger members of the party got their share.

The return trip was made thru Cranbrook, when good weather was encountered from there until their arrival home. The Ford journey stood up well during the journeying, only a flat tire being registered against it.

Infractions of Game Laws.

Infraction of the Game Laws of the Province by the shooting of wild duck out of season has drawn penalties in 2 cases recently tried at Onoway, where offenders where offenders were caught shooting duck at Lac Ste Anne. The cases were tried by Turnbull, J. P. of Onoway. John Kime was fined \$25 and his gun confiscated. Patrick Letendre, a breed who claimed he was still under the impression he was still under the half-breed permits which are no longer in effect was fined \$10 and his gun confiscated.

United Church Services.

Union services between Spruce Grove and Stony Plain United congregations will be continued during the month of August, when the services will be held in Stony Plain church at 12 o'clock noon every Sunday. There will be no service at Spruce Grove during August.

N. Booker,
Well Digger,
Stony Plain.

LESSONS ON "HOW TO HOLD THE CADDIE."

Mr Ronnie MacWilliams, well-known golf professional, paid Stony a visit on the 19th. Early in the day he met a number of the ancient game's enthusiasts down town and gave them a series of talks. In the afternoon he met members of the Stony Plain Golf club on the Fair ground, and in company with the president of the club and several others made the rounds of the links. Those interested received instruction which will, no doubt, improve their game; and others were given advice on the proper use of the clubs. Mr MacWilliams has been invited to pay Stony another visit in the near future.

Tuesday's Demonstration.

On Tuesday next, July 31, a demonstration will be given at the Stony Plain Hardware of the new John Deere Binder (genuine Hyett roller bearing). Experts will give you valuable information on your old machines. It will pay you to attend this, starting at ten a.m.

Valuable Road Map.

A new Official Road Map for the Province, printed in folded form, including in addition to the detailed map a great deal of information of value to motorists and travellers, as to regulations, lake and mountain resorts, auto camps, and some statistics of a more general nature, has been issued by the Publicity Bureau of the Provincial Government, and can be purchased at news stores, hotels, etc., at 25 cents each.

The Sun's Calendar.

JULY—
26—Movie Picture, Moose Hall.
26—Mrs Louise Appel's Sale at Onoway.
